

GOENKANS JOIN SAVE THE TIGER CAMPAIGN

A presentation on 'Save the Tiger' was conducted for students of G D Goenka World School by Mrs Sharmishtha. The presentation provided a good overview of the sharp decline in tiger's population and wanted all to join hands to save the dwindling numbers of tigers in India. This program aimed to educate children from the grassroots level about how important it is to save the tiger. **Save our Tigers campaign** is a collaborative effort from Aircel and WWF India to save the wildlife (especially tigers) worldwide. This presentation brought to light the real programme in its full glory. It was heartening to see clips on how the tiger is being massacred in our country. Tiger, the national animal of India, has been on key target of poachers and there are just 1411 tigers left in India. A Postcard campaign followed the presentation. Children were advised to write a message to the Environment Minister, stating their opinion on conservation issues. Regular activities will follow in the coming weeks where children will be exposed to more issues on tigers. The program was attended by all Middle School teachers and students.

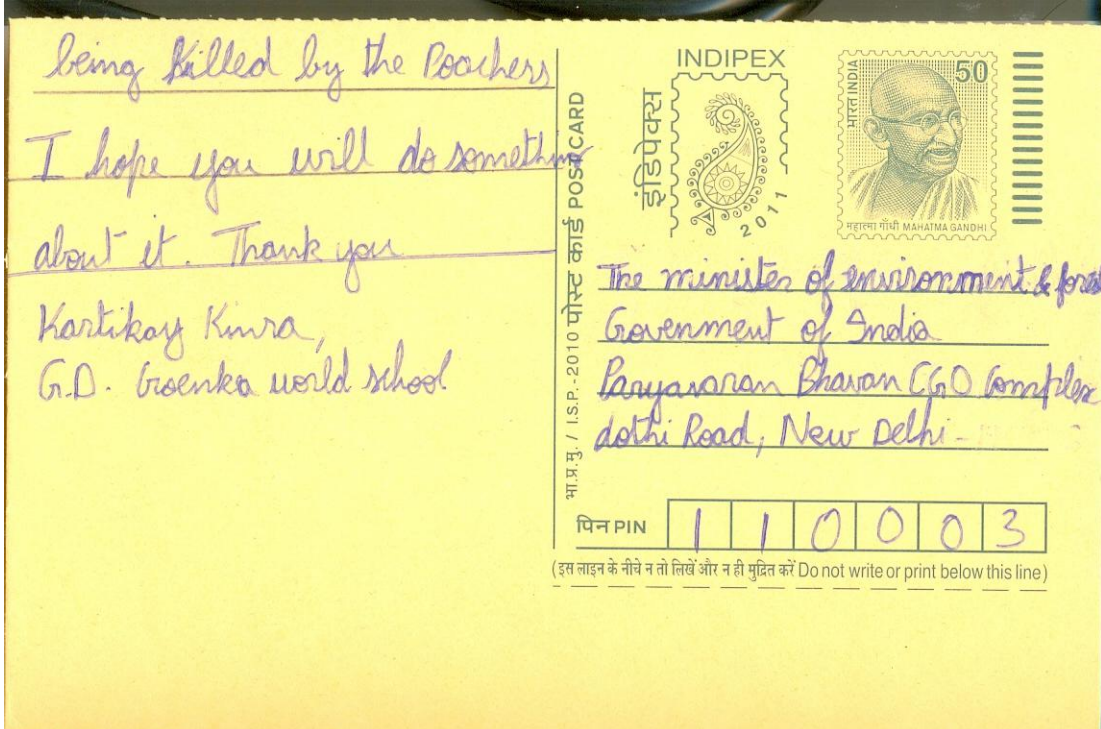

GOENKANS JOIN SAVE THE TIGER CAMPAIGN

Dear ma'am,

I am writing this letter to you for saving tigers. Tigers are our national animal and I would hate to see them die.

If the tiger dies the food chain will be imbalanced.

and also if they die eventually the forests will die too.

The number of tigers have decreased to 1,700 from 40,000. They are being killed for their skins by poachers.

They people who are trying to save the tigers are

GOENKANS JOIN SAVE THE TIGER CAMPAIGN

As you and me both know tigers are an endangered species. As the tiger is also India's national animal it is our job to do all we can to get them out of danger from being extinct. If the tigers become extinct it will affect all the other species and eventually it will affect us. With the extinction of tigers the forests will get destroyed along with the fresh water that us humans drink so at the end it will affect us the most. It is very shocking how there are only 1700 tigers left and if we don't do something we will have no tigers left. Please do all you can to help the tigers and so will I.
